

## EarPlay DR!

High Performance Sound with Natural Response and Eye Catching Designs! Great for today's Digital Audio and Video Devices

High Quality Design Built for today's Digital Content. The EarPlay DR is designed to produce a Rich Natural Sound with out distortion for people that want a unique fashionable look. The Buds are constructed using High Grade Aluminum (not plastic) which allow for reduced ambient noise while delivering the full sound of the driver. The buds are tipped with soft flexible ear gels that are comfortable for hours and hours. Includes extra Ear gels for larger or smaller ears to ensure maximum comfort for all users. The Quality doesn't stop there the plug molding is also made using High Grade Aluminum which allows maximum protection for the connector end of the headphones. The connector is gold plated to ensure the best connection possible. So if your looking for a quality headphone made for today's digital content, there's no doubt, this is the inPlay!
