

## EarPlay XB!

### High Performance Sound with Extra Bass! Great for today's Digital Audio and Video Devices

High Quality Design Built for today's Digital Content. The EarPlay XB is designed to give a Deeper Richer Bass with out Compromising the quality of the rest of the musical range. The Buds are constructed using High Grade Aluminum (not plastic) which allow for reduced ambient noise while delivering the full sound of the driver. The buds are tipped with soft flexible ear gels that are comfortable for hours and hours. Includes extra Ear gels for larger or smaller ears to ensure maximum comfort for all users. The Quality doesn't stop there the plug molding is also made using High Grade Aluminum which allows maximum protection for the connector end of the headphones. The connector is gold plated to ensure the best connection possible. So if your looking for a quality headphone made for today's digital content, there's no doubt, this is the inPlay!
